Contents

	About the Author	xiii
	Foreword by Nancy Woodward	xv
	Preface	xvii
Part I	Introduction	23
1	Introduction to Pervasive PSQL	25
1.1	Introduction	25
1.2	Database, Database Server, and Database Language	26
1.3	The Relational Model	27
1.4	What Is SQL?	32
1.5	The History of SQL	36
1.6	From Monolithic via Client/Server to the Internet	37
1.7	Standardization of SQL	39
1.8	The History of Pervasive PSQL	43
1.9	The Structure of This Book	45
2	The Tennis Club Sample Database	47
2.1	Introduction	47
2.2	Description of the Tennis Club	47
2.3	The Contents of the Tables	50
2.4	Integrity Constraints	53
3	Installing the Software	55
3.1	Introduction	55
3.2	Downloading Pervasive PSQL	55
3.3	Installation of Pervasive PSQL	55
3.4	Installing a Query Tool	56
3.5	Downloading SQL Statements from the Website	56
3.6	Ready?	56
4	SQL in a Nutshell	57
4.1	Introduction	57
4.2	Creating Databases	57
4.3	Creating New SQL Users	59
4.4	Creating Tables	61
4.5	Populating Tables with Data	62
4.6	Querying Tables	64

4.7	Updating and Deleting Rows	66
4.8	Optimizing Query Processing with Indexes	68
4.9	Views	69
4.10	Users and Data Security	70
4.11	Deleting Database Objects	71
4.12	Grouping of SQL Statements	71
4.13	The Catalog Tables	72
4.14	Definitions of SQL Statements	80
Part II	Querying and Updating Data	83
5	SELECT Statement: Common Elements	85
5.1	Introduction	85
5.2	Literals and their Data Types	86
5.3	Expressions	94
5.4	Assigning Names to Result Columns	97
5.5	The Column Specification	99
5.6	The System Variable	100
5.7	The Case Expression	101
5.8	The Scalar Expression Between Round Brackets	106
5.9	The Scalar Function	106
5.10	Casting of Expressions	110
5.11	The Null Value as an Expression	113
5.12	The Compound Scalar Expression	114
5.13	The Aggregation Function and the Scalar Subquery	125
5.14	The Row Expression	125
5.15	The Table Expression	126
5.16	Answers	126
6	SELECT Statements, Table Expressions, and Subqueries	131
6.1	Introduction	131
6.2	The Definition of the SELECT Statement	131
6.3	Processing the Clauses in a Select Block	135
6.4	Possible Forms of a Table Expression	140
6.5	What is a SELECT Statement?	143
6.6	What is a Subquery?	143
6.7	Answers	149
7	SELECT Statement: the FROM Clause	153
7.1	Introduction	153
7.2	Table Specifications in the FROM Clause	153
7.3	Again, the Column Specification	154
7.4	Multiple Table Specifications in the FROM Clause	155
7.5	Pseudonyms for Table Names	158
7.6	Various Examples of Joins	159
7.7	Mandatory Use of Pseudonyms	162
7.8	Accessing Tables of Different Databases	165
7.9	Explicit Joins in the FROM Clause	165
7.10	Outer Joins	169
7.11	Additional Conditions in the Join Condition	176
7.12	The Cross Join	179
7.13	The FROM Clause with Table Expressions	179
7.14	Answers	187

8	SELECT Statement: the WHERE Clause	193
8.1	Introduction	193
8.2	Conditions Using Comparison Operators	194
8.3	Comparison Operators with Subqueries	198
8.4	Comparison Operators with Correlated Subqueries	201
8.5	Conditions Coupled with AND, OR, and NOT	203
8.6	The IN Operator with Expression List	206
8.7	The IN Operator with Subquery	208
8.8	The BETWEEN Operator	214
8.9	The LIKE Operator	216
8.10	The IS NULL Operator	218
8.11	The EXISTS Operator	220
8.12	The ALL and ANY Operators	223
8.13	Scope of Columns in Subqueries	230
8.14	More Examples with Correlated Subqueries	234
8.15	Conditions with Negation	239
8.16	Answers	242
9	SELECT Statement: SELECT Clause and Aggregation Functions	251
9.1	Introduction	251
9.2	Selecting All Columns (*)	252
9.3	Expressions in the SELECT Clause	253
9.4	Removing Duplicate Rows with DISTINCT	254
9.5	When Are Two Rows Equal?	257
9.6	An Introduction to Aggregation Functions	259
9.7	COUNT Function	261
9.8	MAX and MIN Functions	265
9.9	SUM and AVG Functions	270
9.10	The Top Specification	274
9.11	Answers	277
10	SELECT Statement: the GROUP BY Clause	281
10.1	Introduction	281
10.2	Grouping on One Column	282
10.3	Grouping on Two or More Columns	285
10.4	Grouping on Expressions	287
10.5	Grouping of Null Values	289
10.6	General Rules for the GROUP BY Clause	289
10.7	Complex Examples with GROUP BY	292
10.8	Answers	297
11	SELECT Statement: the HAVING Clause	301
11.1	Introduction	301
11.2	Examples of the HAVING Clause	302
11.3	General Rule for the HAVING Clause	305
11.4	Answers	306
12	SELECT Statement: the ORDER BY Clause	309
12.1	Introduction	309
12.2	Sorting on Column Names	310
12.3	Sorting on Expressions	311
12.4	Sorting with Sequence Numbers	313
12.5	Sorting in Ascending and Descending Order	315
12.6	Sorting of Null Values	317

12.7	Case Insensitive Sorting	318
12.8	Answers	319
13	Combining Table Expressions	321
13.1	Introduction	321
13.2	Combining with UNION	322
13.3	Rules for Using UNION	324
13.4	Keeping Duplicate Rows with ALL	327
13.5	Set Operators and the Null Value	328
13.6	Answers	329
14	Updating Tables	331
14.1	Introduction	331
14.2	Inserting New Rows	331
14.3	Populating a Table with Rows from Another Table	334
14.4	Updating Values in Rows	337
14.5	Deleting Rows from a Table	342
14.6	Answers	343
Part III	Creating Database Objects	345
15	Databases	347
15.1	Introduction	347
15.2	Creating Databases	348
15.3	Retrieving and Changing Data on Databases	350
15.4	Security of Databases	352
15.5	Dropping Databases	353
16	Creating Tables	355
16.1	Introduction	355
16.2	Creating New Tables	355
16.3	Data Types of Columns	358
16.4	Creating Temporary Tables	367
16.5	Naming Tables and Columns	368
16.6	Default Value of a column	369
16.7	Table Options	371
16.8	Tables and the Catalog	374
16.9	Answers	376
17	Integrity Constraints	379
17.1	Introduction	379
17.2	Primary Keys	381
17.3	Alternate Keys	383
17.4	Foreign Keys	385
17.5	The Referencing Action	389
17.6	Naming Integrity Constraints	391
17.7	Non-modifiable Columns	391
17.8	Deleting Integrity Constraints	392
17.9	Integrity Constraints and the Catalog	392
17.10	Answers	393

18	Characters Sets and Collations	395
18.1	Introduction	395
18.2	The Character Sets of Pervasive PSQL	397
18.3	Assigning a Collation to a Column	399
18.4	Sorting with Collations	399
18.5	The SET DEFAULTCOLLATE statement	400
19	Changing and Dropping Tables	401
19.1	Introduction	401
19.2	Removing Entire Tables	401
19.3	Renaming Tables	402
19.4	Changing Table Characteristics	403
19.5	Adding Columns	404
19.6	Moving Columns	405
19.7	Renaming Columns	408
19.8	Changing Columns	408
19.9	Dropping Columns	411
19.10	Adding Integrity Constraints	412
19.11	Dropping Integrity Constraints	413
19.12	Decoupling Tables from Files	414
19.13	Answers	417
20	Storage Structures and Indexes	419
20.1	Introduction	419
20.2	Rows, Tables, and Files	419
20.3	How does an Index Work?	421
20.4	Processing a SELECT statement: the Steps	424
20.5	Creating Indexes	428
20.6	Defining Partial Indexes	429
20.7	Non-modifiable Indexes	430
20.8	Decoupling Indexes from Files	431
20.9	The Table Option LINKDUP	431
20.10	Dropping Indexes	433
20.11	Indexes and Primary Keys	434
20.12	Indexes and Foreign Keys	436
20.13	The Big PLAYERS_XXL Table	437
20.14	Choosing columns for Indexes	438
20.15	Hints, Indexes, and the Performance of Queries	443
20.16	Indexes and the Catalog	445
20.17	Answers	447
21	Views	449
21.1	Introduction	449
21.2	Creating Views	449
21.3	The Column Names of Views	453
21.4	Views and Privileges	454
21.5	Deleting Views	455
21.6	Views and the Catalog	456
21.7	Restrictions on Changing the Contents of Views	456
21.8	Processing View Statements	457
21.9	Application Areas of Views	460
21.10	Answers	464

22	Users and Data Security	465
22.1	Introduction	465
22.2	Adding and Removing users	466
22.3	Changing the Names of Users	467
22.4	Changing Passwords	468
22.5	Granting Table and Column Privileges	469
22.6	Granting Database Privileges	473
22.7	Assigning Users to Groups	474
22.8	Recording Privileges in the Catalog	477
22.9	Revoking Privileges	478
22.10	Security of and through Views	480
22.11	Protecting the Catalog Tables	481
22.12	Answers	482
Part IV	Procedural Database Objects	483
23	Stored Procedures	485
23.1	Introduction	485
23.2	An Example of a Stored Procedure	486
23.3	The Parameters of a Stored Procedure	490
23.4	The Body of a Stored Procedure	491
23.5	Local Variables	493
23.6	The SET Statement	495
23.7	Flow Control Statements	496
23.8	Calling Stored Procedures	502
23.9	Querying Data with SELECT INTO	505
23.10	Error Messages, SQLSTATE, and the SIGNAL Statement	509
23.11	The BEGIN ATOMIC Statement	511
23.12	A Set of Rows as Output	514
23.13	Retrieving Data with a Cursor	516
23.14	Updating and Deleting Data with a Cursor	521
23.15	The Options of a Stored Procedure	523
23.16	Stored Procedures and the Memory Cache	525
23.17	Stored Procedures and the Catalog	527
23.18	Removing Stored Procedures	527
23.19	Security with Stored Procedures	528
23.20	Advantages of Stored Procedures	528
24	Stored Functions	531
24.1	Introduction	531
24.2	Examples of Stored Functions	532
24.3	Removing Stored Functions	536
25	Triggers	537
25.1	Introduction	537
25.2	An Example of a Trigger	538
25.3	More Complex Examples	540
25.4	Triggers and Integrity Constraints	545
25.5	Removing Triggers	547
25.6	Triggers and the Catalog	548

31	Transaction and Multi-user Usage	549
31.1	Introduction	549
31.2	What is a Transaction?	549
31.3	Starting of Transactions	553
31.4	Savepoints	554
31.5	Stored Procedures and Transactions	556
31.6	Problems with Multi-user Usage	557
31.7	Locking	560
31.8	Deadlocks	561
31.9	The Isolation Level	561
31.10	Waiting for a Lock	562
31.11	Answers	562
	Appendices	565
A	Syntax of SQL	565
B	Scalar Functions	603
C	System Stored Procedures	623
D	Bibliography	633
	Index	635
